He sent the wrong maps. Jackie is going to send the maps that correspond to what the surveyor is marking in the field and I will forward them to you.

**Subject:** Neuhauser - survey contractor

Dear Tom – The survey team has arrived at the Site and requested direction regarding what they were supposed to do. After listening to the discussion and providing input, it is EPA's understanding that Geosyntec provided the surveyors with a map of some kind with a numbering system. I believe the surveyors are going to mark the perimeters of Phase 1, 2a, and 2b since they can't mark any points inside those excavations. They will mark an additional 200+ points on the Site, including areas that have already been test-pitted in the last two days.

Please provide EPA and CDPHE with the Geosyntec map and numbering system so we will know what the stakes represent in the field.

Thank you.

**Cc:** Stovall - CDPHE, Curtis; Dave Folkes; Jackie Rowley; Sandusky, Eric  
**Subject:** RE: Neuhauser - survey contractor

We are a little confused about what the survey stakes mean. For example, the surveyor just marked Phase 2a with boundary stakes in the shape of a square. Who identified the four corners of the square and what does that mean in terms of any further investigation for buried metal?

Thanks!

Joyce
